

Aescripts Cloners + Effectors v1.2.8 (Win, Mac)

2025-02-10 17:04:57 [label](#) [我要反馈](#) [下载页面](#)

Aescripts Cloners + Effectors v1.2.8 (Win, Mac) is a procedural animation program for Results. Particularly useful when animating a number of layers at precisely the exact same moment. It permits you to animate using effectors rather than keyframing every coating.

Creating complicated animations with a lot of layers and keyframes has consistently been a tough and time-consuming undertaking.

Using Cloners+Effectors, you are able to animate numerous layers at precisely the same time utilizing a massive collection of effectors and falloffs. This workflow is well-known for several 3D software and lets you create those intricate animations in a couple of minutes. While remaining fully customizable.

New Features in v1.2

- Path cloner
- Path Point cloner
- Path effector
- Path Ends effector
- *Only available in AE 2018 and above
- Change: Offset Variation is no longer linked to Offset
- Change: Cloner layers can be parented
- Change: A trial limit of only 20 clones has been removed
- Course cloner
- Route Point cloner
- Course effector
- Path Ends effector
- Only accessible AE 2018 and over
- Change: Offset Version is no more connected to Offset
- Change: Cloner layers could be parented
- Change: The trial limitation of just 20 clones has been eliminated
- Could make the sound set up for animating into the sound spectrum of a sound monitor
- Repeat cloner system
- Repeat effector
- Can bake without the capability to unbaked
- Works with windows and HiDPI panels
- Video Overview of those new Attributes

Cloners

Instantly install cloned layers at a Linear, Radial, or Grid design. These routines can be manipulated parametrically to make the specific outcome you're searching for. You might even use the bunch cloner and render all of the clones as your initial layers, which makes it effortless to restore Indices and Text.

Effectors

Insert among the seven strong effectors to reestablish Your own clones. Easily control primary properties such as standing scale and color. Or include any numerical or color parameter in your own cloned layer using one click. You may even command possessions from any filters that have been added.

Utilize the Random or Measure effector to make more complicated patterns. Use effectors such as Pulse or even Noise to make animation without placing down one keyframe. Blend many effectors for supreme control.

Falloffs

Insert falloffs to some effector and haul it around your Clones to reestablish them. This workflow allows you to make innovative animation in merely a few keyframes. You have a fantastic idea of what your animation will look like before you set the initial keyframe, along with the cartoons that will be simple to edit and fix.

Text

Cloners+Effectors make it Simple to produce complex Text animations. You are giving unparalleled control within your text cartoons.

Illustrations

Animate examples or vector logos quicker than before. Instantly add alterations to whole illustrations using one effector.

2D along with 3D

Clone and reestablish both 2D Along with 3D layers. And restrain people's 3D layers in After Effects 3D space.
