edtFTPnet PRO v9.4.0.40 .NET SFTP and FTPS library

2026-09-10 11:08:04

EdtFTPnet/PRO is partly set with functions and controls for secure file transfers. It gives integration to .NET applications.

EdtFTPnet/PRO supplies a set of powerful and strong, easy-to-use controls and components that make moving files using the FTP, FTPS, SFTP, SCP, and HTTP/HTTPS protocols per cinch. All protocols have been supported in one component.

EdtFTPnet/PRO Secure File Transfer to your .NET Length Businesses worldwide rely on edtFTPnet to safely transfer their private files. EdtFTPnet has older, optimized elements packaged with features that assist .NET programmers include FTP, FTPS, and SFTP customer support to their programs.

It supports password, public key, and keyboard-interactive authentication in addition to known server identification and automated validation. It may manage Zlib compression and OpenSSH, SSH.COM, along with PuTTY personal important formats. The part utilizes AES128-ctr, AES192-ctr, and AES256-ctr ciphers; also, it can restart partially finished binary transfers.

Regarding functionality, the library provides simultaneous and multiple transfers and desktop transfers using an extensive asynchronous API. In addition, the program is capable of bandwidth throttling and information compression.

It's compatible with any edition of the .NET frame above, and it supports both the 32-bit and 64-bit Windows. Users may set up multi-protocol customers with simple switching. What's more, directory transfers and synchronization are possible, together with progress tracking and advanced logging capabilities.

SOCKS 4, SOCKS 5, and HTTP proxies are supported, making it a useful tool for programmers. You may carry out web file transfers with HTTP / HTTPS successfully.

EdtFTPnet/PRO is a complex and feature-packed .NET element that You may visually drop onto edited and forms. It gives numerous features and services for popular FTP technology. It gives simultaneous and many links in addition to various manners.

EdtFTPnet PRO Great Attributes:

- Robust and recognized FTP parts
- FTPS, SFTP, and SCP
- Multiple protocols supported from the 1 part
- Multiple, simultaneous transfers using FTP connection pools
- Directory transfers and directory synchronization
- Royalty-free licensing

SFTP and SCP (SSH file transfer)

- Complete support for SFTP (FTP over SSH) and SCP (secure copy)
- Supports password, public key along with keyboard-interactive authentication
- using known_hosts document for server identification in Addition to automatic validation
- Supports Zlib compression
- Supports OpenSSH, SSH.COM along with PuTTY personal Important formats
- Supports aes128-ctr, aes192-ctr, and aes256-ctr ciphers
- Resuming of trades which have partly finished

FTP

所有软件资源 100%安全 已检测 无病毒 无篡改

标签

Other Components .Net

- Support for all standard and Lots of optional FTP operations, active and passive modes, and service for an extensive Assortment of FTP servers
- Support for FXP server-to-server transports
- Resuming of trades which have partly finished

HTTP

- Support for internet file-transfers with HTTP/HTTPS
- Support to the resumption of partial HTTP transfers

Proxies

- Total support for SOCKS 4 and SOCKS 5 proxies
- Support for HTTP proxies

Performance

- Supports multiple, simultaneous transfers
- Supports background transfers Using a comprehensive asynchronous API
- Bandwidth throttling and information compression

Simplicity of use

- The multi-protocol customer that allows switching protocols using one method call
- The Identical easy, intuitive API is the most favorite edtFTPnet/Free customer, meaning updates to secure transfers Are.Straightforward
- Support for FTP scripting
- Strong FTP command shell, helpful in batch tasks or script growth
- FTP flows for handling the remote server for a data flow
- Progress tracking, allowing telling of the progress of file transfers
- Directory transfers and directory synchronization
- Advanced logging capacities

General

- Compatible with .NET 1.1, 2.0, 3.0, 3.5, 4.0 and higher models
- Support for 32-bit and 64-bit Windows
- Royalty-free, so no limitations on installation and no additional costs
