Skia4Delphi v5.0.0 (21 Mar 2023) Retail

2024-12-18 23:01:45

Skia is an excellent open-source library that renders 2D text, geometries, and images focusing on accuracy, quality, and performance. Skia provides flexible APIs with a broad range of software and hardware platforms.

Google's Skia Graphics Library is the graphics engine used in various products, including Google Chrome, Chrome OS, Android, Flutter, Xamarin, Mozilla Firefox, Firefox OS, and more.

Skia4Delphi is an open 2D graphic API for Delphi that is based on Google's Skia Graphics library.

Paulo Cesar Botelho Barbosa and Vinicius Felipe Botelho Barbosa created the project. They are passionate Delphi developers with more than 15 years of experience in programming. Developers developed the library for developers. We hope that it will help and can be beneficial to everyone.

Skia4Delphi is an open-source software that demands an investment of time and effort, and to achieve the best quality, we have received help from many different individuals. We thank Jim McKeeth and Ian Barker for supporting and guiding us. Nevertheless, we invite you developer, interested in helping us to build a great tool, to collaborate and share some of your time. We are a friendly and open-minded group, hoping to accomplish beautiful things together.

Skia4Delphi Great Features:

- Canvas 2D and Text Layout;
- CPU software rasterization;
- GPU-accelerated rendering;
- Right-to-Left rendering;
- SVG rendering and creation;
- PDF output;
- Runtime effects;
- Shading language;
- Shaders, masks and color filters;
- Image and path effects;
- Animated image player; (Lottie, GIF, WebP)
- Image codecs; (bmp, gif, ico, jpg, png, wbmp, webp, and raw images)
