This is the fifth class in my series on brush-making and it will teach you more about the process of combining two brushes in one Dual Brush so you can be more artistic using your brushes!

There is no need for previous experience in creating brushes for this class, however, these classes assist you in understanding the different settings available in the Brush Studio.

In order to take this class, you require an iPad with Procreate, and more preferably using it should come with the Apple Pencil. If you're comfortable with the application and Procreate, you'll be able to follow the course! I'll guide you through every step and explain each step!

In this class, we will create a few brushes using native Procreate brushes. Then we will design two brushes from scratch! It's a fantastic learning experience!
