VCL   Delphi   Components

AlphaControls stands out as a renowned C++ Builder and Delphi application suite, offering a comprehensive set of VCL components for RAD Studio. This offline installer provides skinned and non-skinned options, making it versatile for various applications. The suite encompasses an array of controls, from buttons and checkboxes to combo boxes, list boxes, and trees, providing developers with diverse tools to enhance user interfaces. Additionally, AlphaControls includes a skin editor, empowering users to craft custom skins for a personalized aesthetic.

introduces significant features and improvements. Notable enhancements include new comboboxes with improved performance and features, custom borders for controls, new animations, and support for RAD Studio Athens 12. The rewritten comboboxes, not derived from standard ones, offer increased control over component bounds and more accurate scaling. Custom borders for controls add a layer of visual appeal, with configurable width, color, and radius in either skins or individual control properties.

AlphaControls proves to be a powerful tool for creating visually striking and functional user interfaces. With 90 controls, each exhibiting unique behavior, this package is a go-to solution for developers seeking to elevate the design of their applications. The platform-independent skins ensure consistent aesthetics across different Windows versions, and the ability to create editable skins adds flexibility for incorporating new borders and shadowing effects without compromising functionality. In essence, **AlphaControls** is an excellent choice for those looking to add a touch of style to their Delphi or C++ Builder applications, offering a rich collection of graphic and rendering tools with real-time rendering capabilities.

Key Features of AlphaControls :

1. Suite for C++ Builder/Delphi applications
2. VCL components for RAD Studio
3. Supports skinned and non-skinned applications
4. Wide range of controls: buttons, checkboxes, comboboxes, list boxes, trees

5. Skin editor for creating custom skins
6. Rewritten comboboxes for better control and scaling
7. Custom borders for controls with configurable width, color, and radius
8. Platform-independent skins for consistent aesthetics across Windows versions
9. Editable skins for adding new borders and shadowing effects without affecting functionality
10. 90 controls with unique and distinctive behavior
11. The rich collection of graphic and rendering tools
12. Real-time rendering capabilities
13. Suitable for developing visually appealing and functional user interfaces in Delphi or C++ Builder applications
