

Stimulsoft Reports v2025.3.5 for Blazor (.Net 6.0 & 8.0)

2026-08-10 14:00:10

Stimulsoft Reports for Blazor is a Blazor-based reporting tool that is a versatile application. It supports Blazor Server and Blazor WebAssembly, and thus you may produce and display reports on the server or in the browser itself. Nothing is needed but a contemporary web browser, no additional movements or extensions.

This tool provides you with all the tools you need to create professional reports, whether it is as simple as invoices or as advanced and interactive as possible. The in-built designer and viewer are highly customizable, have several themes and languages, and have recently also an artificial assistant to assist in formulating queries, refining reports, and automating operations. There is also a library of ready-made templates to develop faster.

Stimulsoft Reports for Blazor is easy to add to your project - you simply install it in NuGet or download the package and add it to your Razor pages. It can be used with numerous different data sources, including SQL databases, JSON, XML, Excel, Google Sheets, and OData, among others. And most importantly, reports can be fully integrated with any other Stimulsoft product, allowing you to create them on a desktop, edit them online, and execute them in Blazor without any complications.

Key Features of Stimulsoft Reports for Blazor:

1. **Blazor Server & WebAssembly Support** – Run reports on the server for maximum performance, or fully in the browser with WebAssembly for lighter server load.
2. **Report Designer & Viewer** – Create, edit, and preview reports directly inside your Blazor app, with support for theming, localization, and interactive elements.
3. **AI Assistant** – Integrated AI helps generate queries, check expressions, optimize reports, and even convert code for smoother workflows.
4. **Rich Data Connectivity** – Connect to popular databases (SQL, MySQL, PostgreSQL, Oracle, MongoDB, etc.) as well as file formats like JSON, XML, Excel, and CSV.
5. **Cross-Platform Compatibility** – Reports designed in other Stimulsoft tools (desktop or cloud) can be used in Blazor apps and vice versa.
6. **Simple Integration** – Quick setup using NuGet packages or direct libraries, plus a Publish Wizard to make deployment effortless.
