**Andre Josselin – Signature Presets:** Introducing my Lightroom & Photoshop preset pack, a collection designed to enhance your photography with unique and diverse colour tones. With seven distinct color presets, you'll find options ranging from soft and beautiful hues for harsh lighting to punchy golden browns and deep blues, perfect for indoor shots. Additionally, I've incorporated grain and tone tools to provide a creative playground for your editing process.

Finding your style in photography is a journey and, often, the most challenging aspect. However, it's also the most rewarding. Achieving a level where others recognize your work amidst countless images is a testament to your artistic vision. It requires experience, taste, a contemporary colour palette, and the ability to tell a compelling story through your images.

My presets serve as a foundation for your post-processing journey, offering inspiration and guidance while allowing your unique style to shine through. They won't detract from your creativity but provide a starting point to elevate your images. Whether you're drawn to my aesthetic or seeking to expand your creative horizons, these presets offer a versatile toolkit for your editing needs.

It's essential to remember that while presets can streamline your workflow, the essence of photography lies within you. Let these presets inspire you to explore new possibilities, experiment with different techniques, and develop your signature style. Embrace the process of growth and evolution in your craft, and use these presets as a springboard to create images that resonate with you and your audience.

Please note that these presets are compatible with Adobe® Lightroom® 4 or later and Adobe® Camera Raw CS6 or later on desktop platforms.
