

## App Builder v2025.32 (07 Sep 2025) for Windows + Portable Edition + Patcher

2025-09-10 20:24:21    label 我要反馈    下载页面

**App Builder** is a versatile visual development environment designed for effortlessly creating modern desktop and mobile apps. Supporting HTML5, CSS, and JavaScript, this platform ensures a unified codebase for crafting applications compatible with platforms like Google Android, Apple iOS, and Microsoft Windows. Its integration with Apache Cordova streamlines the setup process, automatically preparing essential files and incorporating official Cordova plugins.

simplifies coding with features like the Quick code list, expediting JavaScript development by providing easy access to controls, properties, and methods. The platform includes essential tools such as the Files Manager for seamless linking of files, a User Functions Manager for custom functions, and a contextual help feature for easy reference. It supports translation into multiple languages with the app languages manager and ensures proper display with the auto-scale feature on different screens.

Moreover, **App Builder** incorporates an Open AI assistant for source code-related queries, ChatGPT interactions, and the creation of realistic images from natural language descriptions using DALL-E. With its user-friendly interface, extensive feature set, and cross-platform compatibility, DecSoft App Builder emerges as a comprehensive solution for modern app development, offering efficiency and convenience to developers.

### Key Features of App Builder :

1. Professional visual development environment for creating modern desktop and mobile apps.
2. Supports HTML5, CSS, and JavaScript, ensuring a unified codebase across platforms.
3. Compatible with Google Android, Apple iOS, and Microsoft Windows, including HTML5 apps, WebApps, Progressive WebApps, Web Extensions, and Hybrid apps.
4. Integrated with Apache Cordova for seamless setup, automatic configuration, and inclusion of official Cordova plugins.
5. Quick code list feature in the code editor for accelerated JavaScript coding, providing easy access to controls, properties, and methods.
6. Files manager for effortless linking of JavaScript and stylesheet files, addition of images, JSON files, and entire
