AEScript CropROI 1.2 (Current version): Say goodbye to the hassle of manually adjusting layers after cropping precomps! Introducing CropROI. An efficient solution that streamlines the process without the headache. Just follow these simple steps:

- Open your pre-composition.
- Add the Region of Interest.
- Switch back to your main composition.
- Select the precomp LAYER in your main composition.
- Click the "CropROI" button.

Compatibility:

- Adobe After Effects CS6+

New Changes:

- We fixed a bug where the precomp would unexpectedly move to another location.
- They addressed the issue where the children of the pre-comp layer would shift after cropping.

Experience the ease of CropROI, making your pre-comps more manageable and saving you valuable time in Adobe After Effects!
