Blindusk – 8mm FILM GRAIN (PNG, MOV)

2025-02-10 16:50:33   label 我要反馈   下载页面

- 4K UHD
- ProRes 422 Quicktime
- More than 20 variants
- 98 frames per second
- Modular design for the most accurate film look
- For Premiere, Final cut, AE, Resolution, and many others.

EASY TO USE

- No installation needed
- No need to guess - Simply place your footage above the video and use the blending mode

WHAT IS THIS PACK?

These film scans have a subtle grain that is high-quality and preserves all of the texture and dust from 8mm footage.

Drag & Drop your video to the Blend mode and select "Overlay".

TECHNICAL CHARACTERISTICS FOR REAL FILM

Several tests and many experiments have led us to this point. Drag and drop your footage onto your timeline to get THE LOOK
The 8MM package includes everything you need to make your project look like the 50s or 90s movie.

MAXIMUM MODULAR FLEXIBILITY

To achieve the best film look, the pack comes with multiple grain options (fine to medium), which allows for maximum flexibility.

You can cover every pixel with stunning film texture, no matter what resolutions you need for your projects now or in the near future.

THIS PRODUCT CONTAINS

- Multiple 4K 8mm Aspect Ratio
- 19 UHD Analog Film Grains Textures to Add Instant Film Grain
- For Premiere Pro and FCPX, detailed tutorials
- Film grain details (fine, medium, and coarse).
- 4K Prores422 mov files
