Introducing FILM Desktop Preset,

FUJI PRO 400H and KODAK PORTRA. ILFORD BW, and many more #lookslkefilm presets. Digital photography is for those who love film looks as much as they love digital. This pack is for you!

This pack contains:

- 10 presets for the film looks in the lightroom, each emulating different films.
- The pack contains modifiers that add grain to 35mm and 120mm film looks
- Tutorial on how to use it
- Here are some tips!

These presets were created for Lightroom Desktop (not mobile). These presets were created using RAW images but can also be used with JPEG images. While I tested the presets on both file types, it is important to remember that these presets will have the greatest impact if you are working with RAW images.
