Converters selected layers to Null Items or Stage Lights.

### What's Layer Converter

Twist Converter automatically converts chosen layers to Null items or Point Lights. Minimalist design uses the script as straightforward as you can. Only one click is required!

- Works with all kinds of layers.
- Converts multiple layers at the same time.
- Works using 2D and 3D layers.
- Copies of every kind of keyframe.
- Converts chose layers to Null items or Stage Lights.
- traffic turning, orientation, and position (in the 3D coating ) of chosen layers.
- Changes moderate's title to'Emitter Number (index number)'
- return the coating order

Point Lights are ready for Trapcode Particular. Every Lighting's name will Be shifted to'Emitter' using a suffix in the indicator number.

The script can also be ideal for Plexus. You can replace each Kind of a coating to Null Item or moderate for incorporating a geometry.
