

## Directory Monitor Pro v2.16.1.3 Multilingual + Portable Edition + Patch

2025-05-28 09:46:06    label 我要反馈    下载页面

**Directory Monitor Pro** is a powerful tool designed for real-time surveillance of directories and network shares, offering immediate notifications for file changes, access, deletions, modifications, and new additions. Its broad functionality extends to local and hidden directories, providing comprehensive monitoring capabilities.

The software excels with features such as balloon notifications, subdirectory and file attribute tracking, and the ability to execute applications or scripts in response to detected events. With support for logging changes to text files, inclusive/exclusive filters, and automation options, **Directory Monitor Pro** caters to diverse user needs. It operates seamlessly as a Windows service, identifies the user and application/process responsible for changes, and even generates snapshots for tracking alterations during network downtimes.

stands out as a reliable and efficient solution for proactive file monitoring, ensuring users are promptly informed about every aspect of their directories and network shares. Its versatility extends further through a command-line version and the incorporation of custom plugins, offering users a comprehensive toolset for real-time surveillance and management of their file systems.

### Key Features of Directory Monitor Pro:

- 1. Real-time monitoring of file modifications, deletions, renames, new files, and file access.
- 2. Surveillance for local directories or network shares, including hidden/private shares.
