

## Winsoft Crypto for Android v1.4 for Delphi 10.4-12 Athens Full Source

2024-12-18 23:04:00 label 我要反馈 下载页面

makes it easy to use Android's built-in cryptographic features in your apps. It works with Delphi and C++Builder versions 10.4 to 12, giving developers access to Android's powerful cryptography APIs. Whether securing data or handling encryption tasks, this library helps you integrate security features without needing to write complex code. Plus, with the registered version, you get full access to the source code, offering more flexibility and control.

Best of all, any apps you create using **Winsoft Crypto for Android** can be distributed without worrying about royalties. However, it's important to note that the library doesn't include implementations of any cryptographic algorithms; instead, it relies on the capabilities built into the Android operating system.

### Key Features of Winsoft Crypto for Android :

1. Supports Delphi/C++Builder (10.4 - 12): Fully compatible with the latest Delphi and C++Builder, making integration smooth and simple.
2. Leverages Android Cryptography APIs: Uses Android's native APIs for encryption, decryption, and other cryptographic tasks, allowing you to take advantage of Android's robust security features.
3. Source Code Included: The registered version comes with full source code, allowing you to customize and adapt the library as needed.
4. Royalty-Free Distribution: Build and distribute your applications without ongoing costs or licensing fees.
5. No Built-in Crypto Algorithms: The library itself doesn't implement cryptographic algorithms; it bridges Android's
