Lilia Alvarado, The Girl With Sunflowers, Editing: This tutorial will walk you through the entire editing process, from the RAW SOOC file until the final edit. Adobe Camera Raw, as well as Photoshop, is utilized to process all post-processing. According to Lilia Alvarado's previous students, the techniques you've learned should be translated into different versions of Photoshop and Lightroom. But, as she's not proficient with Photoshop Elements or Lightroom, purchasing any editing software other than the one she is using can be made your own decision.

IN THIS TUTORIAL, YOU'LL LEARN HOW TO:

- Utilize color grading techniques to enhance the overall tone and color of the image
- It can produce stunning yellow, green and blue shades
- Increase the dimension and the depth
- Modify skin while keeping a natural-looking texture
- Sharpening in general and selectively
- Edit the background and foreground in a flash.
- Replace sky

WHO THIS TUTORIAL IS FOR:

Photography enthusiasts or competent photographers who are proficient in the basics of photography and editing images, Photoshop navigation tools, layers, and masks.

SOFTWARE USED:

Adobe Camera Raw 13.1 and Photoshop 2020
