Trippy Portal Animations using Cinema4D: Welcome to this class, where I'll guide you through creating four trippy animations using Cinema4D and Octane Render. By the end of this course, you'll not only have mastered various techniques but also have the freedom to experiment and create your own unique animations.

Here's what you'll learn in each lesson:

- Introduction: Get acquainted with the course objectives and what to expect from each lesson.
- Projects Overview: Understand the scope of the four animations we'll be creating, giving you a clear roadmap for your learning journey.
- First Portal Animation Using Octane Scatter: Learn how to utilize Octane Scatter to create mesmerizing portal effects in your animations.
- Second Animation Using Cinema4D Cloner: Learn to use the Cloner tool in Cinema4D to create intricate and dynamic animations.
- Third Animation using Boole and Cloner: Experiment with Octane materials and explore advanced techniques like Boole to create visually stunning animations.
- Fourth Portal Animation using Photoshop and Cinema4D Cloner: Combine the power of Photoshop and Cinema4D to craft a captivating 3D tunnel effect, adding another dimension to your animations.
