Save time on your FTP and SFTP tasks with **FTPGetter Professional**. This software allows you to plan, schedule, and automate file transfers between your home and office, ensuring that your data is synchronized according to your schedule. With a centralized console, you can manage all your transfers easily and efficiently.

includes a built-in terminal emulator for executing commands on remote servers, automatic synchronization to keep your files up-to-date, and support for shell scripting to handle complex tasks quickly. You can set up scheduled uploads and downloads, specify file masks for batch processing, and even automate commands before and after transfers to streamline your workflow fully.

Stay secure with SSL/TLS and SFTP protocols, and connect through FTP, SOCKS, or HTTP proxy servers if needed. FTPGetter supports multithreaded processing, allowing you to work with multiple servers simultaneously without delays. This makes **FTPGetter Professional** a versatile and powerful tool for automating your FTP and SFTP needs.
