The Inkscape Master Class with Nick Saporito: Become a master of Inkscape with our comprehensive Inkscape Master Class, consisting of over 60 videos covering every tool, feature, and function in Inkscape. Led by our expert instructor, you'll gain a deep understanding of Inkscape's capabilities and learn practical techniques to enhance your design skills.

Course Contents:

- Basics: Learn about installation, layout overview, dockable menus, custom themes, navigating the canvas, the select tool, snapping, and more.
- File Menu: Discover how to open and import files, use the clipart directory, save your work, export designs, manage batch exporting, set document properties, and create templates.
- Edit Menu: Explore Inkscape preferences, make bitmap copies, create clones, work with tiled clones, and more.
- View Menu: Learn about view and display modes, rotating the canvas, and using Xray and split view mode.
- Layers Menu: Understand layers and objects.
- Object Menu: Master grouping objects, using guides, raising and lowering objects, working with the fill and stroke menu, strokes, gradients, patterns, swatches, markers, clipping masks, layer masks, aligning and distributing objects, arranging objects, using the transform tool, and more.
- Path Functions: Explore paths, path operations, offsetting paths, tracing bitmaps, and pixel art.
- Path Effects: Learn about path effects, including attaching paths, bending paths, using BSpline, constructing grids, fillet and chamfer corners, dashed strokes, envelope deformation, and hatches.
- Text With Text: Discover how to create text, flow text into a frame, and put text on a path.
- Filter Effects: Understand filter effects.
- Inkscape Tools: Master various tools, including the select tool, edit paths by nodes, shape builder, squares and rectangles, circles and ellipses, stars and polygons, 3D boxes, spirals, bezier pen, tweak objects, zoom, measurements, closed path ellipse, drawing freehand lines, calligraphy pen, spraying objects (airbrush), eraser, bucket fill, gradients, colour picker, and diagram connectors.

Who Should Take This Course:

- Individuals who want to learn Inkscape efficiently without watching long and tedious videos.
- Those interested in quickly exploring Inkscape's capabilities.
- Beginners looking for a comprehensive introduction to Inkscape.
- Interactive Video Lessons: Each lesson is presented in video format, allowing you to follow along as our instructor shares their screen, explains features, and demonstrates how they work. All videos are available in 1080p format with English captions and can be downloaded for offline viewing.
- One-on-One Support: Enroll in the Inkscape Master Class and gain access to our private community, where you can ask questions and receive personalized support from our instructor. We're committed to ensuring no question goes unanswered, providing you the assistance you need to succeed.
- Ad-Free Experience: Unlike tutorials on YouTube, our Inkscape Master Class offers a premium, ad-free experience. This allows us to focus on delivering the most valuable information without distractions or self-promotion.
