FMSoft uniGUI Complete Professional v1.99.0.1613 + Runtime + Theme Pack + Documentation

2026-07-13 10:43:02

FMSoft uniGUI Complete Professional is a revolutionary web application framework that empowers Delphi developers to seamlessly transition into the world of web development. By providing a comprehensive set of visual components that mirror those found in Delphi VCL, uniGUI offers a familiar and intuitive development environment within the IDE. This unique approach ensures a comfortable learning curve and allows developers to create, design, and debug web applications with ease.

Powered by Sencha Ext JS, uniGUI delivers exceptional performance and scalability, making it ideal for building stateful web applications. With advanced scripting capabilities and complete IDE support for project management and design, uniGUI enables developers to create sophisticated web applications with minimal effort. offers various deployment options, including ISAPI Module, Standalone Server, Windows Service, and Native Apache 2.4 Module, ensuring flexibility and compatibility across different platforms.

Supported across a wide range of Delphi versions and platforms, including Win32, Win64, and Linux64, uniGUI Complete Professional caters to diverse developer needs. Additionally, C++ Builder support expands its usability, making it accessible to a broader audience. With uniGUI HyperServer technology, developers can unlock the full potential of their projects, transforming them into dynamic and state-of-the-art web applications that deliver unrivalled performance and functionality across all major browsers.
