Super-High Speed Motor Bikes!

Road Riders introduces a brand new spin on what you'd typically think of hearing from a motorbike. It focuses on the distinctive sound of Ducati's premium motorcycles, such as the 2012 Ducati Panigale as well as the Ducati Monster. Ducati Monsters are two of the most powerful. They are unique in their sound and is suitable for many things that go beyond motorcycles, such as film-based whoosh sounds, spaceships as well as a myriad of other vehicles from the sci-fi genre. We've also added a lot of extra material, ranging from the whine and whiz from the 2012 Yamaha FZ8 to the grit and roar of a sliced 2002 Honda Shadow. Road Riders was recorded in the location of Quebec on Canada's open country roads. Road Riders adds an element of raw energy to any music production.
