2 Lil' Owls Foundry is a stunning collection of creative Lightroom/ACR presets created to provide you with gorgeous moody, rich hues. They have an urban feel to them, and I enjoy using them for my landscape, still life urban photographs, and much more.

My preset collections are extremely adaptable. They don't make any adjustments to the exposure of your image So you can define the line of exposure and apply your presets, without having to reset your exposure. A majority of collections don't alter your white balance unless there is an artistic enhancement that is required to apply a Preset.

These presets are completely adaptable!

Includes: 35 ACR presets

Compatible with: Lightroom Classic 7.3+ and CC, Photoshop Camera Raw. Be aware that these presets do not work with the earlier version of Lightroom.

(ACR presets cannot be used (ACR presets are not compatible with Photoshop Elements - Elements version of Camera Raw does not support these presets. Certain features included in the presets might not be accessible if you use an old version of Photoshop).
