CyberLink PhotoDirector Ultra:

Generative AI editing tools now offer unparalleled creative control, allowing users to precisely customize facial features, poses, and artistic styles using reference images and text prompts. One-click enhancements improve image quality by removing noise, unblurring, and upscaling details, while automatic retouch tools refine portraits and reshape bodies with ease. Users can also blend styles, extend images seamlessly, and replace objects with AI-driven content generation, making it simpler than ever to achieve professional-grade visuals. Features like background expansion, object removal, and targeted retouching streamline the creation of polished, high-quality images without the need for complex studio setups.

"CyberLink PhotoDirector Ultra" Sample:

- **AI Image Extender:** Seamlessly expand images in any direction with AI-generated content.
- **One-Click Face Retouch:** Instant face retouching for a polished look.
- **AI Face Deblur:** Unblur faces while keeping the background blur for a natural focus.
- **AI Face Swap:** Swap faces across photos, including celebrities and artwork.
- **AI Replace:** Replace parts of an image using text prompts for fast edits.
- **Auto-Tone Refinement:** Boost brightness and contrast for vivid details.
- **AI Headshot:** Create professional headshots from a single photo.
- **AI Background Generation:** Generate unique backgrounds for people and objects with AI.
- **AI Outfit:** Generate cohesive, stylish outfits with AI.
- **AI Image Enhancer:** Restore facial clarity and detail in photos.

Enhanced Tools:

- **AI Object Removal** - Remove objects and people from photos cleanly.
- **Background Removal & Effects** - Edit backgrounds, including colors, blur, or imported images.
- **AI Denoise** - Reduce graininess while keeping details.
- **AI Image Upscaler** - Enlarge images up to 4x without losing quality.
- **AI Deblur** - Instantly remove motion and focus blur.
- **Dehaze & Defringe** - Clear up haze, fog, and color fringes.

Graphic Design Tools:

- **Layer Editing** - Create logos, graphics, and artwork.
- **Text Tool** - Add text with various fonts and effects.
- **Object Selection** - Auto-select objects, animals, or people.
- **Layer Masks & Adjustment Layers** - Non-destructive editing tools for fine-tuning.
- **Express Layer Templates** - Pre-designed templates for faster editing.

Portrait & Body Editing:

- **Body Height Adjustment** - Adjust body height for natural stature.
- **Concealer & Wrinkle Remover** - Remove blemishes and wrinkles.
- **Auto Body Reshaping Tools** - Reshape busts, waists, legs, arms, and hips.
- **Auto Skin Smoothener & Skin Tone Adjustment** - Smooth skin and adjust tones.
- **Face, Eye, Nose, Eyebrow, and Lip Shapers** - Fine-tune facial features with precision.

Artistic Effects:

- **AI Image Generator (Outline, Fusion, Text Prompt)** - Generate unique images from references or prompts.
- **AI Scene & Anime Generators** - Create scenes and anime-style art.
- **AI Cartoon, Sky Replacement, & Depth Map Effects** - Apply various creative and focus effects.
- **Blur, Bokeh, and Light Effects** - Add customizable blur and lighting effects.
- **AI Art Generator - Sticker Maker** - Create stickers with transparent backgrounds.

Color Adjustments & Filters:

- **Auto Color Enhancement** - Optimize colors in images.
- **Color Splash, Color Replace, & White Balance** - Selectively enhance colors and adjust temperature.
- **Filters/LUTs & 3-Way Split Toning** - Apply unique styles and tone adjustments.

Animation Tools:

- **Photo Animation & Dispersion Effects** - Animate photos and create dispersion effects.
- **Video to Animated GIF** - Convert videos into GIFs with added text.
- **Light, Sparkle, and Bokeh Effects** - Add motion with customizable effects.

Creative Assets:

- **Royalty-Free Stock** - Access iStock by Getty Images.
- **Stickers & Overlays** - Add animated stickers and overlays.
- **Frames** - Professionally designed frames for added style.

Pro Features:

- **RAW Support** - Support for RAW file formats and uncompressed files.
- **HDR & Panorama** - Create high dynamic range images and panoramas.
- **Multi Exposure** - Combine images for motion trails or multi-exposure effects.
- **Lens Correction** - Fix keystoning, distortion, and chromatic aberrations.
- **AI Photo Management** - Smart face tagging and calendar view organization.

This feature list captures the main functionalities and enhancements, designed to optimize editing, creativity, and professional-grade photo management.
