Mattia Cellotto Rocks Momentum: Its Rocks Momentum sound effects library includes over 1100 different sounds from rocks, bricks, wood logs, and stones crashing against various surfaces, rolling, being scraped against the other, and the list goes on. This library was created in the Italian Alps and within Inverness, Scotland. Defective construction materials were used to record the roofing tiles, bricks, and cement blocks library.

This library also comes with two more releases from Mattia Cellotto, both available for free: Crunch Mode provides 230 crunchy sounds made using a range of fresh bread, vegetables, pizza crust, and various frozen foods. The Borax Experiment gets you an impressive 158 gory, squishy, slimy, and gooey sound effects.

Gfx plugin details of Mattia Cellotto Rocks Momentum
