Spotlight on Oracle v11.0.0.21 for Win x64 & x86

2025-02-04 22:24:49

is a powerful tool designed to help you quickly find and fix problems in your Oracle® database. It provides a live overview of your database's activities, making it easier to spot inefficiencies and areas that need attention. By establishing a standard of normal activity and setting customized alerts, Spotlight on Oracle notifies you the moment any part of your database starts to underperform, helping you to avoid bigger issues down the line.

This tool is especially useful because it finds problems and predicts future ones before they disrupt your database. It's equipped with capabilities to handle issues across different operating systems like Linux, UNIX, and Windows, ensuring that your database environment is efficient. Whether the problem is caused by a specific user, a complex SQL transaction, or a cluster issue in Oracle RAC environments, Spotlight on Oracle has the tools to diagnose and resolve it swiftly.

Spotlight on Oracle's user interface is designed for easy understanding and quick problem-solving. It displays database processes visually, so you can see what's happening at a glance and fix problems with just a few clicks. This saves time and reduces the risk of unexpected database downtimes, which can be critical for business operations.

Key Features of **Spotlight on Oracle**:

1. Real-time Dashboard: Provides live updates and visual representation of database processes for immediate problem detection.
2. Automatic Alerts: Sends notifications when performance drops below set thresholds.
3. Predictive Diagnostics: Anticipates future issues by analyzing current trends, helping you prevent problems before they start.
4. Enhanced SQL Drill-Down: Offers a detailed view of SQL statements to identify resource-heavy queries.
5. Cross-Platform Support: Works across multiple operating systems, ensuring comprehensive monitoring and diagnostics.
6. Troubleshooting Tools: Includes easy-to-read logs and error messages for straightforward problem identification and resolution.
7. Oracle RAC Diagnostics: Specialized tools to handle cluster and node-specific issues in Oracle Real Application Clusters.
