SkinSoft VisualStyler.Net v2.4.0 for Windows Forms

2026-10-04 21:22:57

VisualStyler.Net is the best skinning tool that is designed for C# and VB.Net Windows Forms .Net developers. The product comes with a sophisticated skin editor, as well as 33 professional skins that include Office 2007, Office 2010, Windows 10, Windows Aero, Windows Metro, Windows XP, and Mac-OSX, and you can also utilize every Microsoft Visual Style to skin your application. With over 2000 styles of visuals to pick from, your application is sure to stand out from all the other applications.

VisualStyler is bundled with the Visual Studio add-in that expands your Visual Studio designer-time interface. It provides developers with an extensive WYSIWYG skinning and design-time experience. The component is built using the latest smart-tag designs and makes the tool simple to set up and configure.

The smart-tag designer enables you to quickly set up the component and access all of the design-time features.

The style browser dialog enables you to browse, preview, and select any visual style from the style gallery.

The style import wizard enables you to import new visual styles from any msstyles file or zip archive.

SkinSoft VisualStyler.Net for Windows Forms Great Features:
