Bitmapper 3 – PSD Template CreativeMarket - 7309325: Contrary to comparable products one is not an action pack, it's an actual Photoshop TEMPLATE that is an editable layer template that can be adjusted. It doesn't simply convert your photo from grayscale into a bitmap, it produces the bitmap effect over a Smart Object. You are able to experiment using light, colors, and size to create the desired effect. You can also manage the whole process.

- 1 .PSD File that includes the Template
- 1 .grd file that has 40 Gradients
- 1 .pat file that has 3 different screen textures
