下载页面

Low Key photography can be one of the most difficult forms of photography. It's used to bring attention to a particular part of the subject. This action will make any photo appear as if it was taken with low-key photography.

You can generate five types of light directions by simply selecting the subject and then playing the action. These are top, bottom and left, right, and even lighting. This action is very easy to use.

Files included

- Actions (ATN).
- Readme (Instruction).

Photoshop Version Tested

This action works with Adobe Photoshop CS5, CS6, CC2014, CC2015, CC 2015.5, and CC 2017.

You can run it on both Windows and MAC OS versions.

This will only work in the **English** Version of Photoshop. Please change to English if your Photoshop version is not in English
