2024-12-18 23:02:00

Manage your dynamic Outlook style Schedule requirements with ease and control. Multi Column Day, Month, and Week views - all in one Silverlight Control. Calendar Silverlight offers Direct edit appointment scheduling with multiple calendar dimensions:

- Appointments
- Contacts
- Locations
- Tasks

Across the enterprise and worldwide - enable your end users with functionality to manage the multiple dimensions of Scheduling elegantly. Direct inline editing, multi-object grouping, sorting, and complete data integration for an unparalleled scheduling experience - all in One control.

Multiple Time zone planning and schedule management made simple.

DBI Calendar Silverlight combines three control views;

- Multi Column Day / Resource View
- Month Calendar View
- Week Calendar View...

One compact, feature-rich, royalty-free Silverlight component - expertly add schedule functionality to any Silverlight application.

Data Integration - DBI Calendar Silverlight is designed for data flexibility. Connect to any data source - XML to SQL to Oracle to DB2 ...

Calendar Silverlight expertly manages:

- One to One,
- One-to-Many and
- Many-to-Many

Relationships for each of:

- Appointments
- Contacts
- Locations
- Tasks

It's not uncommon for one appointment, a conference call, to appear in many locations, and have many contacts and tasks associated with that activity. Calendar Silverlight resolves schedule complexities with one holistic management solution wrapped for elegant user experiences.

Variable Time Scale - Life doesn't happen in even, 15, 30, or 60-minute intervals; life happens around the clock and in any combination or permutation of time. With Calendar Silverlight, set your appointment scheduling on any increment of time between 1 minute and 60 minutes!

Onsite service personnel is scheduled when needed, Golf Course Tee Times are scheduled at 7-minute intervals, and components of a dentist appointment may range from 3 to 55 minutes.
