Constructive Modular Loop Layers - Build How You Want It

With the help of more than 185 specially designed horror and fantasy loops, you can easily create worlds. The library is organized to give you all the elements and layers in a complete loop, allowing you to have maximum control over your sound design. Most loops have four variants: Full, Layer A, Layer B, and Layer C. The layers make the complete versions of the loop, which means you'll be able to create more consistency across your work. If, for instance, the standard version of your application has too many things going on, Try using the layers versions to create a more straightforward setup.
