INSTRUCTIONS

There are three ways for applying photo overlays. 1. - using overlay actions (include) 2nd Utilizing Quickstart PSD course (include only in the PRO version) 3rd - the standard Drag'n'Drop technique.

1ST Method: OVERLAYS Action

This is a more progressive method as it permits you to easily apply overlays to any directory, including with other retailers. When you set the parameters of this action you are able to make your hotkey to F3 (for instance) to make sure that with just one press you can make this action 1. Double-click on the overlay Actions .atn the file to import it into Photoshop. After installation, you can access the Actions panel in Photoshop by clicking the menu 'Window > Actions'. There are two actions: JPEG and PNG Overlays. The main difference between Overlay Action JPEG and Overlay Action PNG is that JPEG uses the Screen Blend Mode. 2. Look for 'Overlays Action Click Play any action you require. 3. The Photoshop dialog box appears and asks you to choose the image. Select 'Continue', then locate the folder you extracted and choose the picture you like. The image will instantly be uploaded into the Photoshop folder where the image is displayed. 4. Reflect, scale or rotate the overlay as you like. five. Click the Cmd (Ctrl) and enter, and the operation will result in an overlay mask as well as two adjustment layers. If needed, use a black brush to the layer mask in order to cover the image, if necessary, and then within the adjustment layers, modify the Levels or color so that the overlay appears right for the photo. 6. Save the image, and then show it to your customers. They will be amazed by the outcome

2nd Way The Quickstart PSD Course

This allows you to work within a Photoshop file in which you can choose the overlay you prefer and make layers visible. This is convenient since you can view it on the thumbnails for layers in the image however it is a nuisance that in certain variations that use Photoshop the file might not properly open. This is an optional feature and is included as is.

3RD WAY: DRAG'N'DROP

3.1 Drag the folder to any image to save it within the Photoshop file. For images that have black backgrounds, apply screen blend Mode. To alter the blend mode by double-clicking on the image, the style window of the layer will appear. Select the desired blend mode, then move on with the following step. If overlays have transparent backgrounds it is not necessary to
