Grab 72 silver elements for your website, social media, or blog! All the accessories, iPhones, Macbooks, Macbooks, and iPads in the most versatile shades of silver + space gray! You can also use 9 backgrounds to create stunning scenes.

Scene creators are so cool, but they should be easier! This product was designed to be easy to use - you don't need any tech or photoshop skills. **Drag and drop the elements to create your scenes or images.**

These are image files. **Transparent backgrounds** You can layer them on top of any background or color you choose. You can also choose to have the elements without or with shadows - you decide how they should stand out on your page.

You can see the images below to see how I create blog graphics and Pinterest images. Also, you will find photos that promote digital products (perfect to use on Etsy and Creative Market).

A.zip file is created that contains:

72 transparent PNGS with shadow -72 transparency PNGS sans a shadow

- 9 background images
- PDF How-To Guide
- Canva allows you to edit Instagram Story Templates
- Canva has specific tools that will help you layer items realistically.
