

Create Your Own Pack of Animated Stickers

2025-02-10 16:46:32 [label](#) [我要反馈](#) [下载页面](#)

Create Your Own Pack of Animated Stickers: Let's design a set of fun and engaging Animated Stickers to use in your presentations, Social media, and Websites, as well as your Newsletter!

This hands-on course teaches you how to create stunning GIFs that inject enthusiasm, imagination, and interest into your online presence!

Explore the endless possibilities of animation while I lead you through the step-by-step procedure of creating and animating a complete set full of cute stickers.

During this process, you'll be able to make a new set of illustrations and animate them with Adobe Animate or Procreate. I'll show you how to follow and three different ways to bring your images to life.

At the end of this class, you'll be armed with a vibrant set of stickers to be utilized in your presentations and on social media or your site.

These stickers can serve as visual and dynamic elements that can enhance your storytelling to convey emotion and highlight key elements.

Stickers can also be great for bringing life to the text on a page, breaking it up, and making it fun.

This course will enable you to seamlessly integrate interactive loops into slideshows, making your slides into immersive visual experiences that will leave an impression.

This class benefits both complete beginners and amateur artists, as well as professionals in the field of creativity. There is no prerequisite for experience. However, having a basic understanding of animation software can help the class follow. If you're a professional educator or a student, animated sticker designs are essential to making the slides pop.

WHAT WILL YOU LEARN?

- How to create and use GIFs to enhance your presentations and online presence
- How do I create to create (minimal) animation
- From the initial sketch through the final Illustration
- Three animation methods to help bring a spot-based illustration to life
- How do you export your GIFs
- How do I create a texture to a texture After Effects
- How do you use and share your animated stickers
- How do you choose Hashtags to use for your animated stickers
- Tips on how you can make use of Your Stickers' Pack

WHAT WILL YOU NEED?

- You'll require a tablet, an iPad, and a pen to create digitally and then animate the stickers. You will also require the drawing software you prefer.
- There's no requirement for specific software, but I'll demonstrate how I create stickers with Adobe Photoshop, Animate CC, and Procreate. I'll be animating in both programs to show you the different options.
