- The auto animation mode (1 click to create an animation of the scene)
- Set the speed using markers

### What is Text Animation Presets?

Text Animation Presets are pre-made and predefined animations that can be effortlessly applied to text elements within video editing and motion graphics software, such as Adobe After Effects. These presets are crafted to streamline the process of generating dynamic and visually engaging text animations, eliminating the need for users to manually keyframe every aspect of the animation.

In software like After Effects, a text animation preset typically encompasses a collection of pre-configured keyframes, effects, and settings that produce a specific animation style or effect. Users can readily apply these presets to their text layers, saving considerable time and effort compared to constructing animations from the ground up.

The variety of Text Animation Presets is extensive, ranging from straightforward effects like fade-ins and fade-outs to more
