

Tipard Screen Capture v2.1.28 for Win & macOS

2025-04-15 14:26:20

Tipard Screen Capture is an intuitive and versatile tool for capturing screens and recording video/audio with superior quality. Offering easy customization of screen size, this tool allows users to tailor their recordings according to specific needs. It excels in creating tutorials, capturing screenshots, recording webcam content, saving video call chats, and creating game videos. The recording area size can be easily adjusted, offering options like fixed sizes or custom dimensions by dragging the mouse.

In addition to video capture, **Tipard Screen Capture** serves as an Audio Recorder, enabling the recording of audio files on both PC and Mac, including system audio and microphone voice. Users can choose audio sources and save recorded audio files in MP3, AAC, M4A, or WMA formats. The tool also extends its capabilities to recording phone screens, allowing users to record iPhone and Android phone screens with a larger monitor, offering flexibility in output format selection.

includes setting recording time, cursor effects for clearer operation tracking, and direct video preview with volume adjustment. Beyond screen and audio capture, **Tipard Screen Capture** offers a range of additional tools, including a Webcam Recorder, Game Recorder, Snapshot capture, Drawing on Screen, Selective Window Recording, and post-recording editing options. With an easy-to-follow interface, users can efficiently capture, edit, and save their screen activities on Windows and Mac computers.

Key Features of Tipard Screen Capture:
