

## Unreal Engine - 3D DynamicDataCubeChart 01

2025-02-10 16:45:17    [label](#)    [我要反馈](#)    [下载页面](#)

### Unreal Engine - 3D DynamicDataCubeChart 01:

Ensure a smooth integration of the "3D Dynamic Data Cube Chart" asset by following these essential guidelines:

#### Text3D Plugin Requirement:

- The asset utilizes the "Text3D" plugin in the engine.
- Enable the "Text3D" plugin before importing the assets into your project to prevent errors and ensure proper functionality.

#### Project Settings:

- Enable the following project settings:
- Substrate Materials
- Substrate Opaque Material Rough Refraction
- Substrate Advanced Visualization Shaders
- Failure to enable these settings may render the material ineffective.

**Overview:** The "3D Dynamic Data Cube Chart" is a dynamic 3D data visualization tool designed for real-time data presentation. It offers two data presentation modes: percentage and voting. This asset includes an intuitive data cube chart, facilitating seamless integration into data visualization projects and virtual studios.

- **Real-time Data Update:** Modify data in real-time with a single click for instant updates.
- **Customized Experience:** Rich customization options, including color, number of data cubes, images, and text.
- **Animation and Visual Effects:** Features appearance, hiding, and smooth transition animations.
- **Data Interface Functions:** Facilitates easy data transfer through various methods.

#### Technical Details:

- **Static Meshes:** 12
- **Material Instances:** 12
- **Materials:** 19
- **Textures:** 33
- **Data Assets:** 7
- **Structures:** 2
- **Number of Blueprints:** 7
- **Copy Network:** None
- **Windows Support:** Yes

Experience real-time data visualization with ease using the "3D Dynamic Data Cube Chart" asset, equipped with dynamic features and customization options for seamless integration into diverse projects.
