Codinion v1.0.2.93 Support VS 2019

2024-12-18 23:02:00

Boost productivity with Syntax Highlighting, Enhanced Navigation, Banner, along with the Jump List.

It includes two default color topics for the dark and light Visual Studio. What's more, you can change all colors to your requirements. It provides a logo search bar to each C# and VB code window, which assists in discovering procedures, Fields, Properties, Events, Courses. The search bar offers different search choices like add, exclude, or acronyms. It includes an open file in an alternative dialog that can obtain each file in an alternative and open it straight. This conversation supports the same search options as the emblem search bar. The locate symbol in alternative conversation can help to discover logos across all documents in a way.

Visual Studio Banner is instrumental if you work with any source control system such as svn, git, or else and need to utilize the identical solution from various branches. It's possible to specify the banner for every branch that helps to recognize the solution. The banner ads will change the visual studio thumbnail in the windows taskbar icon (windows 7 needed).

Codinion Service VS 2019 Amazing Attributes:

Know new code right away.

Navigate through each solution easily. Locate files or source code quicker with the search.

Easily differentiate multiple Visual Studio cases through modified Windows Taskbar Thumbnails.
