

TMS IntraWeb WebGMaps v1.6.3.0 (18 Oct 2021) for Delphi XE-11 Alexandria Full Source

2025-01-18 23:12:13

TMS IntraWeb WebGMaps IntraWeb as the capability to part with the extensive as well as the configurability for the incorporating of the Google maps right from the software which is available for the users and developers. It should be noted that the TMS software does not have the ability to guarantee the current or even the future operations as well as of time of the Google Map services for the users and developers. It has the capability to offer the consulting as well as a support for the TTIWWebGMaps and it is a reliable as well as a future-proof service available for the users. It also has the capability to offer a refund or any other compensation in case the map of the Google service term as well as the operation changes or even stops suddenly.

TMS IntraWeb WebGMaps Great Features:

It has the following features and attributes that are stated as below such as:

- It has the ability to provide a direct type of map which can be found such as default street map, satellite perspective, the perspective of hybrid, and finally the terrain.
- There is an extra data of the map which can be exhibited such as by cycle View, traffic information, and so on.
- The user has the capability to get as well as display the instructions that are on the map.
- There is the street view which can be chosen by the user and the developer.
- The position markers can be added to the maps just like the default balloons of the Google as well as the habit picture markers.
- There is an extensive configuration choice that are available over the different Google Map controllers which are very accessible such as map type controller, pan controller, scale controller, and last but not least the management of the zoom.
- There is a different mouse as well as alternatives of the keyboard in order to enable as well as disabled, such as mouse wheel scrolling, the panning of the mouse as well as the keyboard and so on.
- It provides the ability to the user in order to include polygons as well as polyline and even circles as well as rectangles right on top of the maps.
- There is a unique support for the updating process which is asynchronous.
