91Vocals Deep House Elevation (WAV): Be lifted with Deep House Elevation, a rich blend of upbeat vocals, contemporary deep house melodies, as well as sharp beats that fill the floor. With uplifting piano melodies warm synths, anthemic pad, vital FX as well as atmospheric layering.

As always, we set the foundations of our work by recording authentic vocals using a premium chain to capture a precisely treated, equalized, and energetic vocal performance. Vocal hooks that are fully vocalized come with dry and wet versions that allow for maximum flexibility. We resampled and transformed our top recordings into ambient loops chopped layers and ear-candy single shots.

The collection is also comprehensive and includes all the original drums and percussion. From the clear and tight house one shots, to percussive loops as well as fills, tops, and percussion. The loops are designed from scratch and provide vital hits that have a distinctive edge. Each loop is meticulously recorded and key-tagged to ensure tempo lock. These royalty-free tracks are great for any of the House as well as EDM sub-genres and could inspire your next production, in any way.

Included files
