Burp Suite Professional v2026.3.3

2026-04-25 09:22:32

Burp Suite Professional is the toolkit for web security testers, trusted for its reliability and effectiveness. This comprehensive suite automates testing tasks and provides expert-designed manual tools to address OWASP's Top 10 vulnerabilities and stay current with the latest hacking techniques.

Offering a balance of smart automation and expert-crafted manual tools, **Burp Suite Professional** enhances efficiency in testing workflows. Burp Scanner, a core component, efficiently scans JavaScript-heavy single-page applications (SPAs) and APIs, with features like prerecording authentication sequences. Its ultra-reliable out-of-band application security testing (OAST) minimizes false positives, revealing otherwise invisible issues.

Frequent releases from PortSwigger Research keep security professionals ahead in web security testing. The toolkit's design, including a robust search function and activity recording, ensures increased productivity and reliability. **Burp Suite Professional** simplifies documentation and report generation, facilitating easy sharing of findings. With extensive customization options, including custom scan configurations and dark mode, users can tailor the toolkit to their specific needs. The powerful API enables collaboration and integration within the **Burp Suite Professional** user community.

Key Features of Burp Suite Professional :

1. Trusted toolkit for web security testers
2. Automation and manual tools for OWASP Top 10 vulnerabilities
3. Expert-designed for reliability and effectiveness
4. Burp Scanner for scanning SPAs, APIs, and prerecording authentication sequences
5. Ultra-reliable out-of-band application security testing (OAST) to minimize false positives
6. Frequent releases to stay ahead in web security testing
7. Robust search function and activity recording for increased productivity
8. Simplified documentation and report generation for easy sharing of findings
9. Extensive customization options, including custom scan configurations and dark mode
10. Powerful API for collaboration and integration within the user community
