It's been a time since my last post, but I'm back with a brand-new Lightroom preset pack! This isn't a typical preset pack. This pack contains 5 of the most popular presets that I've ever made.

Each preset has the most cinematic and filmy look to them. They all work well with the grid of profiles and can make your work look extremely professional!! !

DO BE SURE to SWIPE the COVER TO THE SIDE SO THAT YOU CAN SEE PREVIEWS

PRESETS is a must for:

- LIGHTROOM CC Classic
- LIGHTROOM CC (OLD Version)
- MOBILE LIGHTROOM
- ADOBE Camera Raw

PHOTOSHOP actions

As if this wasn't enough, so I added my own personal Photoshop actions that will prove extremely helpful to anyone who shoots portraits. The first one is my frequency separation, which I use to make it easy for skin retouching that doesn't make the model appear similar to a cartoon) These settings can absolutely save your life! Second, I have included my sharpening tool Never think about the potential of professional sharpening! Of course, I'll give you videos on how to set up and use the tools right!
