

PHP CRUD Generator v2.3.1 (Bootstrap Admin Dashboard Generator) Nulled

2026-09-20 21:11:07

PHP CRUD generator (PHPCG) is a user-friendly web application, expertly crafted with the most popular web technologies to design Bootstrap-powered dashboards with PHP-based CRUD operations.

This intuitive CRUD generator simplifies the creation of your Bootstrap Admin Dashboard through a graphical user interface (GUI).

The flexibility of the CRUD application empowers you to manage data from any relational database, regardless of its complexity or data volume.

Harnessing trusted web technologies, PHP CRUD Generator presents a robust and user-friendly solution for crafting Bootstrap admin dashboards.

A one-page visual interface grants complete database access.

PHPCG conducts comprehensive data analysis, storing information on table relationships, primary and foreign keys, field types and values, validations, and more.

This intelligent analysis configures options tailored to each element of the administration panel.

You can validate the three generator forms to generate your Admin Panel content.

Key Features of Bootstrap Admin Panel Builder with PHPCG:

- Select the table for integration into your Admin Panel.
- Generate the relevant data table for reading (READ).
- Create/edit forms generation (CREATE/UPDATE).
- Generate a deleted form (DELETE).
- Customizable Bootstrap themes and CSS.
- Access to over 20 Bootstrap themes.
- Easily change the Bootstrap theme and customize it with a few clicks.
- Create a comprehensive Bootstrap Admin Panel.

PHPCG provides essential tools for building your Admin Panel, such as dropdown lists with integrated search, date and time pickers, collapsible menus, nested tables, in-place editing, file, and image uploads with editing capabilities and thumbnail generation, help texts, and tooltips.

Additional Features of PHP CRUD Generator:

- Streamlined one-page interface.
- Intelligent database analysis for instant recognition and configuration of your database structure and fields.
- A user-friendly client admin panel built with Bootstrap, incorporating jQuery plugins and advanced features for enhanced usability.
- Complete multilingual support with a single i18n translation file, allowing customization for any language.
- Inclusive Authentication Module, offering comprehensive user and profile management with rights association for each table (read/create/update/delete).
- Highly dependable coding structure, employing an MVC model, a single config file, a router, PHP class, optimized SQL queries, advanced SQL joins, and PHP forms powered by PHP Form Builder (an HTML form builder for Bootstrap) and the HTML Twig Template engine.
