Using gRPC in ASP.NET Core 6 - Shawn Wildermuth

2025-03-27 20:43:33

Explore the cutting-edge approach of utilizing gRPC for API development, characterized by contract-based design and binary serialization, with Shawn Wildermuth's insightful course. "**Using gRPC in ASP.NET Core 6 - Shawn Wildermuth**" provides a comprehensive guide on crafting and employing these APIs across various client environments.

Dive into the realm of gRPC as a high-performance solution for cloud-based APIs and multi-client compatibility. Throughout the course, you'll delve into designing APIs using Protocol Buffers and implementing services that adhere to these contracts. From there, you'll learn how to integrate gRPC into your ASP.NET Core applications and effectively consume gRPC APIs using C# and JavaScript.

By 's conclusion, you'll be equipped with the skills and knowledge necessary to harness the full potential of gRPC in your service-oriented architecture. Whether building cloud-native applications or catering to diverse client environments, this course empowers you to leverage gRPC effectively to build robust and scalable services.

Using gRPC in ASP.NET Core 6 Table of contents:

1. Course Overview (Duration: 1 min)
2. What Is gRPC? (Duration: 17 mins)
3. Adding gRPC to ASP.NET Core (Duration: 36 mins)
4. Creating gRPC Clients (Duration: 67 mins)
5. Securing gRPC (Duration: 38 mins)
