

TIGER VIKRAM BUSINESS SENDER v27.1.1.0 Build 2025.12.17 Multilingual

2026-04-08 07:36:22

TIGER VIKRAM BUSINESS SENDER is a desktop application that enables companies to send a large quantity of WhatsApp messages at a fast pace and with ease. Users do not need to send messages to individuals individually through the phone, but can do so without leaving the PC, saving time and enhancing communication.

The software eases the customization of messages, sorting of contacts, and reaching out to particular groups. It facilitates importing of contact lists and sending personalized messages containing names or any other information, and even administration of WhatsApp groups with the help of some tools that are capable of extracting users, joining groups automatically, or adding users in batches. It also allows the transmission of images, video,s and other forms of media, which would make marketing messages more interesting.

In order to secure user accounts, the program provides scheduling functionality and automatic message delays to aid in preventing spam identification. There are even versions that have a Google Maps lead extractor and an auto-reply bot to handle simple automated responses. Overall, **TIGER VIKRAM BUSINESS SENDER** caters to the needs of businesses, marketers, and agencies that are interested in reaching more customers most effectively with the help of WhatsApp.

Key Features of TIGER VIKRAM BUSINESS SENDER :

1. **Bulk Sending** – Send large numbers of WhatsApp messages to many contacts at once.
2. **Message Personalization** – Automatically insert variables like {{Name}} to make each message feel personal.
3. **Contact Management** – Import contact lists easily from CSV, TXT, or similar file formats.
4. **Group Grabber** – Extract all members from WhatsApp groups into your contact list.
5. **Auto Group Joiner** – Automatically join WhatsApp groups through invite links without manual effort.
6. **Bulk Group Member Adder** – Add multiple contacts to a WhatsApp group in one action.
7. **Multimedia Support** – Send images, videos, documents, and other media files along with messages.
8. **Campaign Scheduling** – Schedule message campaigns to run automatically at a chosen date and time.
9. **Smart Message Delays** – Insert customizable delays between messages to reduce account-ban risk.
10. **Google Maps Lead Extractor (G-Extractor)** – Collect potential leads and phone numbers directly from Google Maps search results.
11. **Auto-Reply Bot** – Automatically respond to incoming messages with predefined replies.
