SubSystems DOCX to RTF Converter v16.0 for .Net + CRACK
2025-06-08 16:13:45   label 我要反馈   下载页面

DOCX into RTF Converter delivers a very simple and hassle-free way of switching from the DOCX into the RTF format inside your program. You may make only 1 function call to perform the conversion.

No additional external elements or programs will be needed if you use this specific converter. The converter comprises a strong DOCX parser used by our TE Edit Control merchandise to offer you a cost-efficient, feature-rich, and powerful translator.

DOCX into RTF Conversion supports the following attributes:

- The transformation from DOCX into RTF format.
- Fonts, point-size, various personality designs, and colors.
- Paragraph formatting attributes like centering, justification, indentation, etc...
- Support for PNG, JPEG, GIF, EMF, and WMF picture formats.
- Embedded and related images.
- Headers/footers.
- Table and nested tables.
- Unicode support.
- Set paper size, orientation, and perimeter distance for RTF output.

Code Output: The created RTF code could be written to a disc or it may be recovered in a memory buffer. The RTF data recovered in a memory buffer could be loaded into an RTF edit controller for example TE Edit Control.

Programming Interface: Your program only uses function calls to perform the conversion. The Win32 and Win64 models contain the purpose and constant declaration documents for C/C++, Visual Basic, and Delphi. The item is usable in almost any environment that allows for phoning easy DLL functions.

The .NET edition of the item consists of pure C# managed code. The .NET variant may also be used in an ASP.NET server application.
