Hyper Hyperlapse Masterclass By Sebastian Otto: HyperHyperlapse is the ultimate course for any photographer, filmmaker, and content maker. Suppose you're interested in learning about the unusual, undiscovered and under-appreciated techniques and styles, the required equipment, and how I edit those super smooth images. In that case, I'm sure that with this course, you'll learn how to make the cleanest Hyperlapses that you can find.

The product is in **Tutorial category** , for more information about this post you can click on the home page link in the sidebar.

WHO IS THIS CLASS FOR?

This tutorial was designed to accelerate the process of learning Hyperlapse. My 90-minute accelerated course will not just teach you the basics but will also provide you with an extensive understanding of the editing process and the VFX.

WHAT PROGRAMS DO YOU USE?

For all my hyper lapses, I'm using three different software. LRTimelapse, Adobe Lightroom, and Adobe After Effects. This free version works to meet our needs. Therefore you don't have to purchase the program.
