Devart dbExpress driver for SQL Server v8.3.1 (27 Aug 2020) for D10.4 Sydney

2026-10-03 18:26:41

DbExpress is basically a database independent coding that has the capability to define a frequent interface in order to provide the users with the rapid access to the server of the SQL from the Delphi as well as C++ Builder just like the Community Edition which is located on the Windows as well as the Mac OS and finally the Linux platforms for the users and the developers. With the help of the particular server it has the capability to provide a motorist which is an independent library and can implement the frequent DbExpress for users and developers for the processing of the queries as well as the stored procedures that are already available. Since the data access coating process is thin and very simple, it has the capability to offer a very high performance database connectivity to its users and it is very easy for the user to deploy it. The user has the capability to use the driver in the same manner as it is provided by the Embarcadero. DbExpress driver for the server of the SQL is capable of offering and access to the server database of the SQL and the function is possible with the high performance of the Microsoft Technology of OLE DB. The driver requires the user to install the OLE DB on the workstation. According to the driver of the DbExpress for SQL Server it is very simple in order to deploy and it does not require the installation of a different data as well as a supplier layer by the user. Additionally, it has the capability to offer SQL Server with not just via the OLE DB, but the SQL client which is native as well. It should be noted that DbExpress for the SQL Server is considered to be a cross alteration for the IDE, for the creation of the application as well as the utilization of the different IDEs what are user, and has a unique support for the fire monkey platform, which allows the user and developer in order to create visual magnificent as well as a high-performance native software for the Mac OS and even windows.
