Smartlaunch Server v4.8.65.0 (10 Clients)

2025-01-01 22:06:47

Smartlaunch is an innovative software for handling esports and gambling facilities. Smartlaunch includes entire POS performance for merchandise sales and solutions, with time monitoring solutions, from computer use to conference room leasing.

The Smartlaunch Server is where you put your esports center's customers and configure your own hardware and software. The Smartlaunch Server operates quietly in the background, and the only time you want to work on the Server is whenever you need to alter preferences.

Gambling facilities, cafes, restaurants, pubs, shopping malls, and family entertainment places use Smartlaunch to bill for entertainment services and create new revenue streams.

To handle the daily operations of esports facilities with higher-end machines, VR, and massive screens for streaming; to sponsor and charge for events and tournaments; to market prepaid tickets, produce loyalty and membership applications, and more.

Control PCs, consoles, and apparatus

Control Xbox, PlayStation consoles, and gambling PCs loaded with matches from the PC. Create new earnings with pool tables, escape rooms, and any self-respecting support you can consider using Smartlaunch.

Games Management

Smartlaunch makes it effortless to provide gambling PCs loaded with countless matches into the demanding group of esports players, which maximizes earnings creation. The supply of sport permits to PCs happens on-demand by Smartlaunch to reduce prices.

Integrated POS

Reduce your old cash register and utilize Smartlaunch's completely integrated POS solution. Utilize a barcode scanner to market merchandise or publish a receipt as soon as your client is completed. The cash drawer will start automatically whenever you get paid.

Personalization

Celebrate the amusement experience of your clients with Private User files. Let your customers continue where they left off, to a different PC, the next time they see your center.

Bulletproof Security

Employ security policies with simplicity to stop unauthorized access to PCs, games, and applications—control access to offices and meeting rooms. Block access to specific sites.

Branding

Design your Smartlaunch Client skin or utilize among those various skins included. The Smartlaunch skin system makes it feasible to alter everything from coloring to fonts, images, and logos.

Reward your clients with loyalty points

Produce User Groups to handle unique kinds of memberships. Establish a distinguished pricing arrangement time, products and provide for every category.

Advanced Statistics and Reports

Create many different statistical reports, such as merchandise sales reports, games use rapports, worker statistics, etc.
