1. BCC+ DeNoise ML: Advanced Noise Removal with AI Precision

Say goodbye to video noise effortlessly with BCC+ DeNoise ML, an AI-powered tool designed for simplicity and detail preservation. This one-click solution automatically removes noise, including low-light and compression artifacts, while intelligently analyzing images to enhance and preserve critical details. Enjoy clear visuals with the ease of drag-and-drop efficiency.

Key Features:

- AI-Powered Noise Removal.
- Artifact Removal: Eliminates noise from low-light and compression artifacts.
- One-Click Efficiency: Instant results with drag-and-drop simplicity.
- Intelligent Analysis: Auto-analyzes images for detail preservation and enhancement.

2. BCC+ UpRes ML (After Effects only): AI-Driven Scaling Tool

Revolutionize your resizing experience with BCC+ UpRes ML, an integrated AI scaling tool. Effortlessly resize your footage to any format with exceptional detail preservation. This tool, available exclusively in After Effects, ensures consistent, high-quality results by handling all format sizes and maintaining fine details during enlargement. Enjoy the flexibility of selective zoom for enhancing specific clip regions.

Key Features:

- AI-Driven Scaling: Effortlessly resize footage with Continuum's integrated AI scaling tool.
- Format Flexibility: Handles all format sizes for consistent, high-quality results.
- Detail Preservation: Sharpens and maintains fine details during enlargement.
- Selective Zoom: Enhance specific clip regions with zoom-in capabilities.

3. BCC+ Audio Visualizer: Dynamic Motion Graphics for Your Music

Let your music come alive with BCC+ Audio Visualizer, a feature that brings auto-animated motion graphics to your audio. Experience vibrant visuals that sync seamlessly with your music, adding an extra layer of creativity to your projects.

Key Features:

- Auto-Animated Motion Graphics: Dynamically visualize your audio with poppin' motion graphics.
- Seamless Music Sync: Motion graphics sync with your music for a captivating experience.

4. Particle Illusion: Advanced Particle Generation with AI

Elevate your visual effects with Particle Illusion, now enhanced with AI capabilities. Generate sprites with unprecedented realism, create particle lines as true 3D objects, and enjoy inherited velocity for more dynamic and authentic visual effects.

Key Features:

- AI-Enhanced Particle Generation: Generate sprites with AI for realistic effects.
- True 3D Particle Lines: Create particle lines as authentic 3D objects.
- Inherited Velocity: Enhance dynamics with inherited velocity for more realistic movement.

5. Performance Boost: Snappier Playback and Tighter Integration

Experience improved performance across the board. Enjoy snappier playback in the FX Editor, benefit from distributed rendering efficiency, and witness tighter integration within Avid for a more streamlined workflow.

Key Improvements:

- Snappier Playback: Enhanced playback experience in the FX Editor.
- Distributed Rendering Efficiency: Optimize rendering efficiency with distributed rendering.
- Tighter Avid Integration: Streamlined integration within Avid for improved workflow.

6. More Presets: 150+ Professionally Designed Presets

Unlock creativity instantly with over 150 professionally designed and curated presets. These presets cover a wide range of styles and effects, providing a quick and efficient starting point for your projects.

Key Highlights:

- Extensive Preset Library: Access over 150 professionally designed presets.
- Creative Starting Points: Instantly enhance your projects with a diverse range of preset options.
- Continuum 2024 brings cutting-edge AI-powered features, offering unparalleled simplicity, detail preservation, and
- creative possibilities to elevate your video editing and visual effects projects.

Super LED Effect

Create the appearance of billboards and LED screens by transforming your images, texts, images, and particles into a stunning pattern of pixels. The program includes 25 professionally designed presets.

Improved Mocha Parameter Tracking

It is easy to place the must-have BCCand effects like BCC+ Lens Flare, BCC+ Super LED, and BCC+ Light into any scene.

Click the button on the right side of your preferred BCCplus effect, and you can open the point or corner pin tracker that uses similar Mocha tools you've become familiar with and love.

Particle Illusion Update

Particle Illusion offers many more innovative features, ideal in motion graphic workflows.

- Create particles from any text-based or mask-based source within your host.
- Increase the imagination for your animated particle effects by using particle trails.
- It is easy to update the color of particles with an improved gradient editor and presets.
- Create organic motion by using forces to cause turbulence direction in an object.
- Make your work faster thanks to a myriad of usability enhancements.

Beat Reactor Comes to BCC+ Effects

One feature that sets Continuum apart from other brands is Beat Reactor, which lets video editors propel effects (and the stories) in the direction of animation by transferring the effects to audio. It's now part of 40 BCCplus effects.

- Create animations of the most popular properties, such as glow or flicker, opacity, and glitch value.

Silver Screen Style

Continuum introduces three new creative options to the wildly popular film style category. It offers 20+ effects and many presets.

- With Smoke and Fog: Add auto-animating smoke presets to graphics and footage.
- Light Flicker BCC+: Add accurate or random photorealistic lighting flicker to any photo.
- BCC+ Orbs Create colored orbs that appear randomly in shots.

A Cut Above

In addition, Co,ntinuum 2023's new GPU-accelerated transitions release includes a smoother transition, with 13 presets.

- BCCand Flutter Cut: Using new features, you can have complete control over the dynamic transition's appearance and feel.

150+ More Presets

Continuum 2023.5 comes with a wealth of professionally designed presets to assist you in achieving the effects, appearances, and transitions your projects require.

You can save time and be more creative using the latest styles across Film Style, Stylize, and Transition effect categories.

Instant Radiance Atmospheric Glow

Welcome to your new favorite glow effect. It combines the power of several different types of lights into one effect. Create a beautiful glow, and then accentuate it using automatic flicker lenses, lens textures, and atmospheric effects such as rays and smoke.

WHAT'S NEW IN CONTINUUM 2025

- New Effect! BCC+ Atmospheric Glow- a versatile filter that combines multiple light textures into a single effect.
- New Transitions! 10 powerful transitions including BCC+ Swish Prism, BCC+ Film Roll, BCC+ Texture Wipe and more.
- Updated Particle Illusion: Better performance, UI changes, and improved 3D model handling.
- Updated Effect! BCC+ Film Glow Effect gets brighter with a secondary glow option.
- New Presets! 250+ new professionally designed and curated presets.
