How to create Illustrated Characters using Procreate

2025-02-10 17:09:43　　label 我要反馈　　下载页面

In this class, I'll show you:

1. Basics of head forms and angles
2. Simple eyes mouth, nose, and the shape of ears.

Then we move it a step further:

1. How can we translate human reference to a character illustrated
2. How do I apply highlights and shadows to create more depth
3. Hairstyles that are fun and stylish.
4. Explore and play with additional textures to spark excitement.

Shorty told me I'll give you everything you should know so that you can make your own characters that have lots of texture. I will guide you step-by-step through my process of thinking and workflow.

This class is intended for those who have some knowledge about the application Procreate therefore not suitable for novices as this isn't an introduction to Procreate the app.

However, it's step-by-step in real-time (so you can pause and rewind as necessary) which means that everyone is able to follow the steps.

This class has been designed for Procreate users which means you'll require an iPad equipped with Procreate on it, as well as a stylus with a pressure sensor.
