Spire.Email for .NET is a professional .NET Email library specially designed for developers to create, read and manipulate emails from any .NET (C#, VB.NET, ASP.NET, .Net Core, .Net Standard, .NET 5.0, MonoAndroid, Xamarin iOS) platform with fast and high quality performance.

As an independent .NET Email API, Spire.Email for .NET doesn't need Microsoft outlook to be installed on the machine. However, it can incorporate Microsoft Outlook document creation capabilities into any developers' .NET applications.

Spire.Email for .NET enables developers to create, edit and send out the message contents with **attachments**. Spire.Email for .NET supports to work with a number of Outlook email message formats, such as MSG, EML, EMLX, **MHTML**, PST, OST and TNEF files.

Spire.Email for .NET is a professional .NET Email library specially designed for developers to create, read and manipulate emails from any .NET (C#, VB.NET, ASP.NET, .Net Core, .Net Standard, .NET 5.0, MonoAndroid, Xamarin iOS) platform with fast and high quality performance.
